FOR IMMEDIATE RELEASE

SIGHTSPEED NOW COMPATIBLE WITH LEADTEK VIDEO SURVEILLANCE IP CAMERAS

*High Quality Video Conferencing Software and Hi-tech IP Cameras
Make Video Surveillance Easy for Home or Business*

BERKELEY, Calif., and FREMONT, Calif. – Dec. 5, 2007—SightSpeed, the leading provider of Internet video communications, is now compatible with Leadtek's high-quality IP-based video surveillance cameras. These IP cameras, unlike the typical webcam, do not require a PC to operate.

With a Leadtek IP camera, registered SightSpeed users simply add the camera to their contact list. Users can then easily place a call to the camera and automatically see and hear what the camera sees. The same can be done from the Leadtek video phone. Users can also manipulate the camera from inside the SightSpeed application.

"SightSpeed users have told us that they use the application as a surveillance tool," said Aron Rosenberg, SightSpeed chief technology officer. "Leadtek's

reputation for making high-quality IP cameras and SightSpeed's award-winning Internet video software offer a powerful option to consumers and businesses in need of security. They can now see and hear better than ever before."

Because the technology is Internet-based, the camera is accessible from anywhere in the world. "Let's say you are traveling in China and you log onto the SightSpeed application. Along with the usual voice/video chatting and Instant Messaging, you can now see video from the camera quietly guarding your home in the U.S. 10,000 miles away," said Hon Sit, president of Leadtek USA. "This unique integration is truly a cool feature."

Leadtek offers four surveillance IP cameras, ranging from less than \$100 to \$400, which are equipped with motion detectors, bi-directional audio transmission by SIP signaling and built-in Web servers for remote management. More sophisticated models offer remote pan and tilt capabilities and in an upcoming version, a night mode that enable users to monitor dark areas.

Leadtek IP cameras and videophones are available worldwide; for details, visit www.leadtek.com. To sign up for SightSpeed, visit www.SightSpeed.com.

About SightSpeed

SightSpeed Inc. is the award-winning provider of Internet video communications for both the business user and consumer. The company offers two services: (1) "SightSpeed Business", the world's first high quality, cost-effective and hardware-free video conferencing service for all businesses (including SMBs); and (2) "SightSpeed 6.0", the most widely praised consumer-focused video chat service that turns a PC or Mac into an easy-to-use video phone to communicate with friends and family around the world. SightSpeed's services are SIP-based and standards-compliant, and the company's revolutionary human perception based technology is patented and based on more than ten years of research and development originating out of Cornell University.

Founded in 2001 and based in Berkeley, California, SightSpeed is a privately held company funded by The Roda Group, best known for launching Ask Jeeves and PolyServe. For more information about SightSpeed, visit www.sightspeed.com.

About Leadtek Research Inc.

Founded in 1986, Leadtek Research, Inc. is a research and development company, which specializes in the design and manufacturing of a wide range of high performance graphics, video and GPS solutions.
